

OSHA COMPLIANCE 2010

Now with
additional date
scheduled!

Maintaining a safe workplace environment is more than just good business practice - it's the law.

It happens all too often. People assume they are in compliance with OSHA, (Occupational Safety and Health Administration), but during a routine inspection, they are shocked at the number of violations they've racked up (and the hefty fines they'll have to pay).

This workshop takes the guesswork out of OSHA compliance. You'll discover smart solutions, "quick fixes" and preventative measures that will help you maintain a safe working environment *and* bring your organization up to OSHA's stringent safety standards.

Course Objectives

- Identify latest changes in OSHA rules and regulations;
- Interpret OSHA's complex language;
- Assess your organization for potential hazards and take action to eliminate them;
- Create and implement a written safety plan;
- Learn how to pass an OSHA inspection; and more.

Who Should Attend

- Safety Personnel • Plant Managers • Human Resources • Controllers or anyone responsible for overseeing safety
- This session is targeted to employees of manufactures of machinery and metal, agribusiness/food, wood, paper and plastic products in Western Wisconsin.

Seminar Dates (Two dates to choose from)

Registration: 8:30 a.m. - 9:00 a.m. Session: 9:00 a.m. - 4:00 p.m.
